Table of Contents

Version 2.7.2 (V2.7.2.0)

Date

2020-10-15

New Features

- Supports Wiegand output User ID

1. You can select either Card ID or User ID for Wiegand output setting.

- Struecture BS2WiegandConfig has been added
- API BS2_GetWiegandConfig has been added
- API BS2_SetWiegandConfig has been added

Modified Features

1. File log output structure of internal SDK has been changed.
Before, it used to write a file from each event processing thread, but now there's a separate file writing thread.
It leads to improve the speed of event processing.

- API BS2_SetDebugFileLog has been added

2. There were fixes for stabilizing the code inside the SDK.
