I

- **I/O device**: A device that performs an information input/output function.
- **Import**: The act of transferring data from one computer into its own system.
- **Intercom**: A communication system that is generally installed in a building or institution by using a Private Branch eXchange (PBX).
- **Intrusion Alarm Zone**: A zone set to emit a warning sound or relay signal if an unauthorized person attempts an intrusion after **Arm**. This zone normally begins monitoring after the day's work, and emits a preset alarm or signal when an intrusion attempt is detected.
- **ISO 19749-2**: An international standard published by ISO that defines the fingerprint format information using the minutiae of fingerprints.
