# Version 1.0.3 (V1.0.3_210705)

## Release

2021-07-12

## Bug fixes

1. It was able to configure the HID Prox card settings for devices (XS2-QDPB, XS2-DPB) that do not support the HID Prox card from the server. (Affects version: v1.0.0)

2. The QR/Barcode sensor did not work properly. (Affects version: v1.0.2)

3. The user ID was output differently from the registered user ID when authenticating a QR/Barcode set as a blacklist. (Affects version: v1.0.2)

4. The existing QR/Barcode authentication option settings were not maintained after restarting the device. (Affects version: v1.0.2)
