How to delete a card

BioStar supports four types of cards: EM, HID, Mifare CSN and Mifare Template cards. However, you can delete EM, HID and Mifare CSN cards only. It is impossible to delete a Mifare Template card since all the necessary information is not stored in the database, but in the card itself.

How to delete an EM, HID, and Mifare CSN card registered to the user

1. Go to the **User** page, choose a user from whom you want to delete a card in the **User** pane and click the **Card** tab.
