1.6.1 Version (V1.6.1_180531)

Release

2018-06-18

New Features and Improvements

1. Support the bypass mode through Wiegand output on smart cards.
 - Bypass mode: It makes the device send out Card Data to 3rd party device without making an authentication. With this mode, the device works as a dummy device, and card data only can be transmitted through Wiegand.
2. Support for connecting new devices.
 - BioLite N2(BLN2-PAB), XPass D2(XPD2-GDB, XPD2-GKDB)

Bug Fixes

1. Issue where the device restarts when authenticating with an unregistered fingerprint.
