P

- **Password**: A string that an individual uses together with their **user ID** for authentication.
- **PIN (Personal Identification Number)**: A serial number given to an individual for their identification.
- **Port number**: The port number used for intercommunication in TCP/UDP. Its range is from 0 to 65535.
- **Private authentication**: An authentication method where user authentication is performed according to the combination of credentials specified by the administrator. This method takes precedence over other authentication methods.
- **Punch**: An **event** that indicates the start time or the end time of work.
- **Punch in**: The act of recording the time of arrival at the workplace.
- **Punch out**: The act of recording the time of departure from the workplace.
