## P

- **Parallel port:** An I/O port that transmits data simultaneously through a parallel interface.
- **Password:** A string that an individual uses together with their **user ID** for authentication.
- **PIN (Personal Identification Number):** A serial number given to an individual for their identification.
- **Port number:** The port number used for intercommunication in TCP/UDP. Its range is from 0 to 65535.
- **Private authentication:** An authentication method where user authentication is performed according to the combination of credentials specified by the administrator. This method takes precedence over other authentication methods.
- **Punch:** An **event** that indicates the start time or the end time of work.
- **Punch in:** The act of recording the time of arrival at the workplace.
- **Punch out:** The act of recording the time of departure from the workplace.
