How to Create Custom User Fields

Custom user fields can be used when you need additional fields for user information other than the basic user information provided.

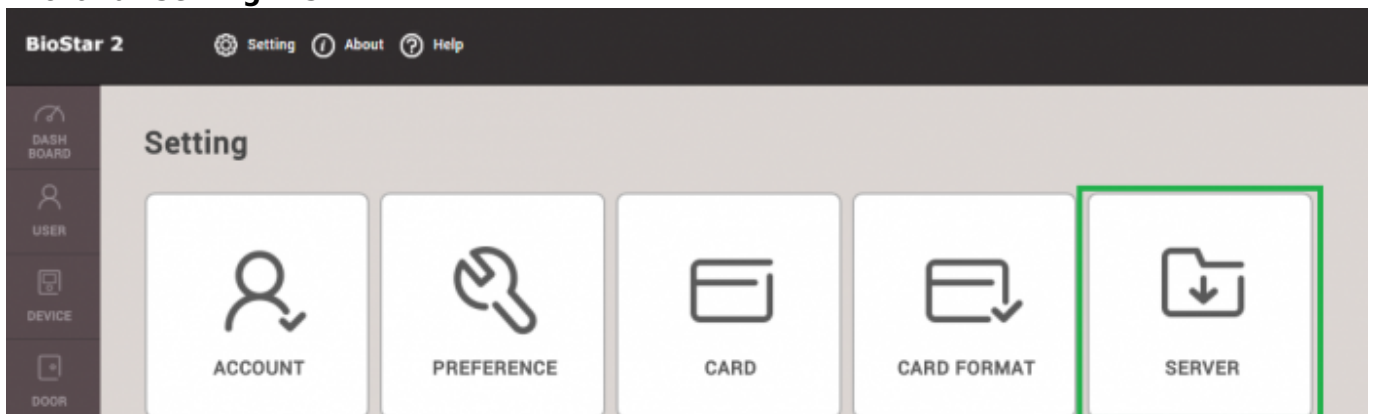

- This feature is available in BioStar 2 versions 2.2.1 and above.
- You *cannot* search users via custom user field values on the search bar.

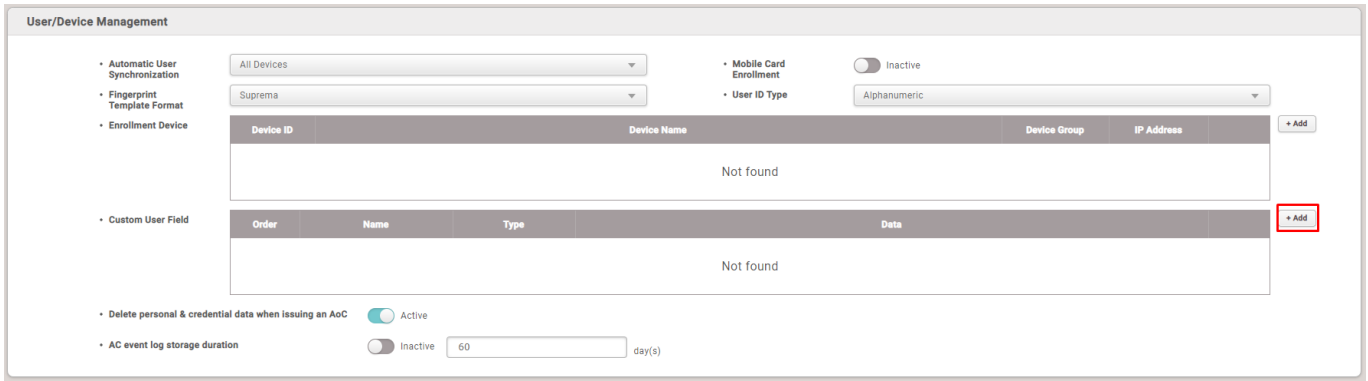

- You *can* import users with custom fields with a .csv file.

1. Click on **Setting > SERVER**.

2. In the **User/Device Management** tab, click + **Add** on the **Custom User Field**.

There are 3 types of custom user fields you can create:

- **Text Input Box** : This field allows up to 32 characters.
- **Number Input Box** : This field allows up to 10 digits.
- **Combo Box** : You can create up to 20 options for this dropdown box. Separate the combo box items with a semicolon(;).

• Custom User Field

Order	Name	Type	Data	
1	Custom Number	Number Input ...		
2	Custom Text	Text Input Box		
3	Custom Combo	Combo Box	option1;option2;option3;option4;option5;option6;option7;option8;option9;option10;option11;opti...	

3. When you're done adding the custom fields, click **Apply** on the bottom of the page.

4. If you go back to the **USER** menu, you will see the additional fields in all existing users and also when you add a new user.

• Custom User Field

Order	Name	Type	Data	
1	Custom Number	Number Input ...		
2	Custom Text	Text Input Box		
3	Custom Combo	Combo Box	option1;option2;option3;option4;option5;option6;option7;option8;option9;option10;option11;opti...
