Leave Management 1

Leave Management

The act of managing personnel absence due to vacations, business trips, external duties, etc. The BioStar platform enables you to set time rules not only for normal and overtime working hours, but also for absences. As such, you can designate a specific time slot as working or non-working. For instance, if you designate the absent time as working, the duration of the user's absence will be recognized as working hours, and their salary will be calculated taking those hours into account.
