Version 2.8.0 (V2.8.0.106)

Release

2020-05-15

New Features and Improvements

1. DB encryption to enhance security on personal information
 - Encrypts profile image, user ID, name, phone number, user IP, Email information for sender and recipients, login ID, login password, face template, fingerprint template, card ID, smart card layout key, custom information for user and visitor, and image logs.
 - Supports manual key storage path setting for encryption key.
2. Supports manual key storage path setting for encryption key.

Main fixes

1. Firmware upgrade does not succeed properly when using 'Secure Communication with Device' option.

Bug fixes

1. An issue when using 'Secure Communication with Device' generates a false error indicating Wiegand readers cannot be used since the firmware or device does not support the option.
