BioStar 1, Upgrade

## BioStar1をアップグレードする方法

以下はBioStar1.93にアップグレードする手順です。

1.52以前のBioStarがインストールされている場合、1.93にアップグレードしてください。  
問題なくアップグレードするには、 [How to Resolve a Database Compatibility Issue](#)を確認してください。

### Software License

If you are using a software license (not a dongle) for BioStar Standard version, back up the BioStar.lic file in `C:\Program Files(x86)\BioStar\server` and paste it to the same location in your upgraded server.

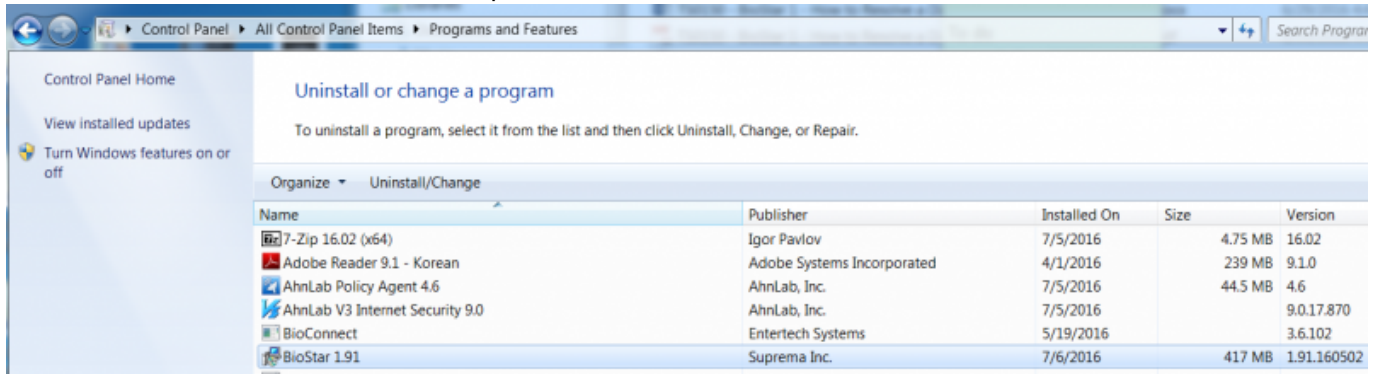

## Upgrade Procedure

If you're upgrading to the latest version of BioStar 1 to use [2nd generation devices](#), read the following article before proceeding  
- [\[BioStar 1\] Limitations with 2nd Generation Devices in BioStar 1.93](#)

Deleting BioStar will not delete your database but please back up your database so that you may revert your database if the database upgrade fails.

1. To back up your database, see [1xfaq\\_how\\_to\\_make\\_a\\_backup\\_of\\_mssql\\_database](#).
- You can restore your database in the future through the instructions, see [1xfaq\\_how\\_to\\_restore\\_a\\_database\\_backup\\_in\\_ms\\_sql\\_server](#).

## 2. Uninstall BioStar from the control panel.

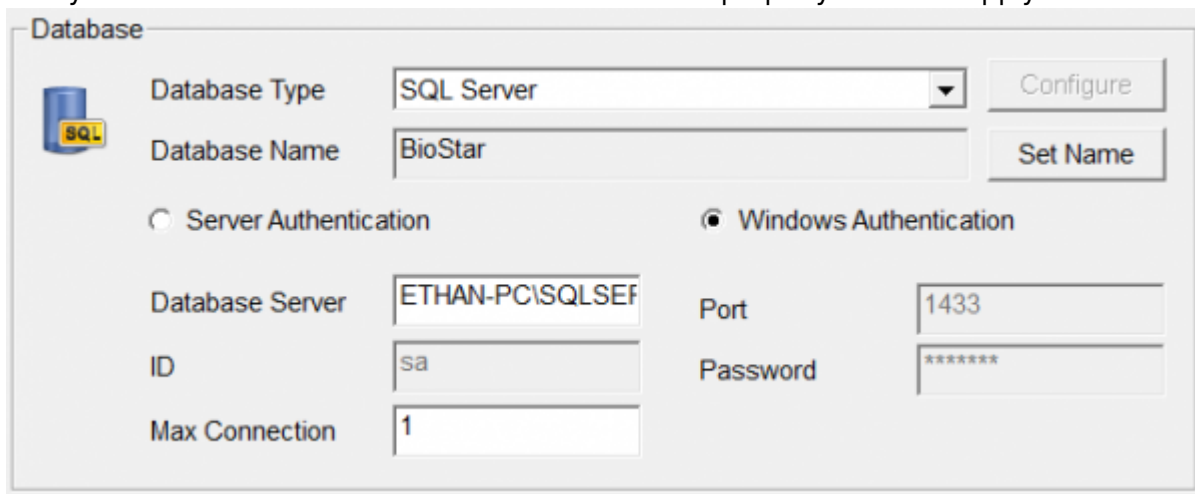

## 3. Download the most recent version of BioStar installation file: [Download link](#).

If you are only using 1.x devices we recommend that you install [BioStar 1.9](#).

## 4. Install BioStar with the setup file.

## 5. After the installation finishes, open BioStar Server Config with administrator privileges and check that your database Server and authentication are set properly and click apply.

## 6. Open the BioStar server folder at C:\Program Files (x86)\BioStar\server.

## 7. Run DBSetup with administrator privileges.

8. Run BioStar and check that all functions operate properly.

If you are having issues with the upgrade, please refer to an article of [Fresh Desk](#) and contact Suprema TS team.
