## W

- [Waterproof](#): A type of processing performed to prevent liquids due to rain, submersion, etc. from permeating the device and thereby affecting its functionality.
- [Weatherproof](#): A degree of waterproof performance somewhat lower than [Waterproof](#).
- [Wiegand](#): A method that transfers a small amount of data using D0 and D1. Generally it is used as a method of communication between the reader and controller of an access control device.
- [Wireless LAN](#): A local area network that uses Radio Frequency (RF) technology. With a terminal fitted with a WLAN card, people can use a communication network within a certain distance from the place where an [access point \(AP\)](#) is installed.
