Configuring Interphone with Authentication ID	1

System Configuration, BioStar 2, SIP, "Videophone"

How to Configure SIP Authentication ID

Before BioStar 2.6 you could only configure an **Account ID** and **Extension Number** with numbers for the interphone feature.

The screenshot shows the 'Interphone' configuration page. The 'Use' checkbox is checked. The 'SIP Server IP Address' field has an error message: 'Invalid User ID. Only number from 1 to 4294967294 are allowed.' The 'Account ID' field has an error message: 'Invalid password.' The 'Account Password' field contains masked text. The 'DTMF Mode' dropdown is set to 'RFC2833'. The 'Extension Number' field is empty.

In BioStar 2.6 and above, you can configure the **Account ID** and **Extension Numbers** with a combination of alphabet, number, and special characters up to 32 characters.

You will need a SIP server to use the interphone feature of A2 and FaceStation 2.

If you would like to configure a SIP server, refer to the article: [SIP based VoIP server for BioStation A2 & FaceStation 2](#)

Configuring Interphone with Authentication ID

1. Log in to BioStar 2 with an administrator account with **DEVICE** configuration privileges.
2. Click on your device to open the device configuration page.
3. Open **Advanced > Interphone**
4. Check **Use**.
5. Configure all fields as necessary.

Open Door Button (DTMF) is the button that will open the door in your SIP client

SIP server port should be set to **5060**

Interphone

Use

• SIP Server IP Address	192.168.12.151	• SIP Server Port	5060						
• Account ID	myidis_01010101	• Open Door Button (DTMF)	*						
• Account Password	*****	• Confirm Password	*****						
• DTMF Mode	RFC2833								
• Extension Number	<table border="1"><thead><tr><th>Extension Number</th><th>Display Name</th><th>+ Add</th></tr></thead><tbody><tr><td>Extension-1</td><td>Jim</td><td></td></tr></tbody></table>			Extension Number	Display Name	+ Add	Extension-1	Jim	
Extension Number	Display Name	+ Add							
Extension-1	Jim
