# How to configure Trigger and Action on Setting

The trigger & action feature is used when you would like to send a custom output signal from a device or send an email to the administrator based on the occurrence of an alarm event.

For instance, you can use this feature to trigger your alarm lamp to go on simultaneously when a forced door open alarm goes on. The system can also simultaneously send an email to the administrator as well.

## Available Triggers

Below is the full list of events that are available for triggers on the setting menu. [Available on BioStar 2 Version 2.9.0 ]

Available events for Device:

- AC Power Failure
- Supervised Input (Open)
- Supervised Input (Short)
- Tamper on
- RS-485 disconnected
- RTSP disconnected

- RTSP connected
- Device restarted
- Device Disconnection Detected
- 1:1 authentication succeeded (ID + PIN)
- 1:1 authentication succeeded (ID + Fingerprint)
- 1:1 authentication succeeded (ID + Fingerprint + PIN)
- 1:1 authentication succeeded (ID + Face)
- 1:1 authentication succeeded (ID + Face + PIN)
- 1:1 authentication succeeded (Card)
- 1:1 authentication succeeded (Card + PIN)
- 1:1 authentication succeeded (Card + Fingerprint)
- 1:1 authentication succeeded (Card + Fingerprint + PIN)
- 1:1 authentication succeeded (Card + Face)
- 1:1 authentication succeeded (Card + Face + PIN)
- 1:1 authentication succeeded (Card + Face + Fingerprint)
- 1:1 authentication succeeded (Card + Fingerprint + Face)
- 1:1 authentication succeeded (ID + Face + Fingerprint)
- 1:1 authentication succeeded (ID + Fingerprint + Face)
- 1:1 authentication succeeded (Mobile Card)
- 1:1 authentication succeeded (Mobile Card + PIN)
- 1:1 authentication succeeded (Mobile Card + Fingerprint)
- 1:1 authentication succeeded (Mobile Card + Fingerprint + PIN)
- 1:1 authentication succeeded (Mobile Card + Face)
- 1:1 authentication succeeded (Mobile Card + Face + PIN)
- 1:1 authentication succeeded (Mobile Card + Face + Fingerprint)
- 1:1 authentication succeeded (Mobile Card + Fingerprint + Face)
- 1:1 authentication failed (Mobile Card)
- 1:1 duress authentication succeeded (Card + Fingerprint)
- 1:1 duress authentication succeeded (Card + Fingerprint + PIN)
- 1:1 duress authentication succeeded (Card + Face + Fingerprint)
- 1:1 duress authentication succeeded (Card + Fingerprint + Face)

- 1:1 duress authentication succeeded (ID + Face + Fingerprint)
- 1:1 duress authentication succeeded (ID + Fingerprint + Face)
- 1:1 duress authentication succeeded (Mobile Card + Fingerprint)
- 1:1 duress authentication succeeded (Mobile Card + Fingerprint + PIN)
- 1:1 duress authentication succeeded (Mobile Card + Face + Fingerprint)
- 1:1 authentication succeeded (Mobile Card + Fingerprint + Face)
- 1: N authentication succeeded (Fingerprint)
- 1: N authentication succeeded (Fingerprint + PIN)
- 1: N authentication succeeded (Face)
- 1: N authentication succeeded (Face + PIN)
- 1: N authentication succeeded (Face + Fingerprint)
- 1: N authentication succeeded (Face + Fingerprint + PIN)
- 1: N authentication succeeded (Fingerprint + Face)
- 1: N authentication succeeded (Fingerprint + Face + PIN)
- 1: N duress authentication succeeded (Fingerprint)
- 1: N duress authentication succeeded (Fingerprint + PIN)
- 1: N duress authentication succeeded (Face + Fingerprint)
- 1: N duress authentication succeeded (Face + Fingerprint + PIN)
- 1: N duress authentication succeeded (Fingerprint + Face)
- 1: N duress authentication succeeded (Fingerprint + Face + PIN)
- Dual authentication succeeded
- Access denied (Invalid access group)
- Access denied (Disabled user)
- Access denied (Invalid period)
- Access denied (Blacklist)
- Fake Fingerprint Detected
- Access denied (Anti-tailgating)
- Access denied (Exceeded threshold temp.)
- Access denied (Temp. Not measured correctly)
- Access denied (Mask not detected)
- Access granted (Check only)

- Access granted (Soft temp violation on check only)
- Access granted (Soft mask violation on check only)
- Access granted (Soft temp and mask violation on check only)
- Access denied (Exceeded threshold temp. On check only)
- Access denied (Temp. Not measured correctly)
- Access denied (Mask not detected on check only)
- Abnormal temp. detected (Exceeded threshold temp.)
- Mask not detected

Supervised Input is used with a DM20. Please refer to [DM-20 Wiring Examples](#) for more information.

#### Available events for Door:

- Held door open alarmed: can be used after setting Door>Alarm>Held Open
- Forced door open alarmed: can be used after setting Door>Alarm>Forced Open
- Held door opened: can be used after setting Door>Door Sensor
- Forced door opened: can be used after setting Door>Door Sensor

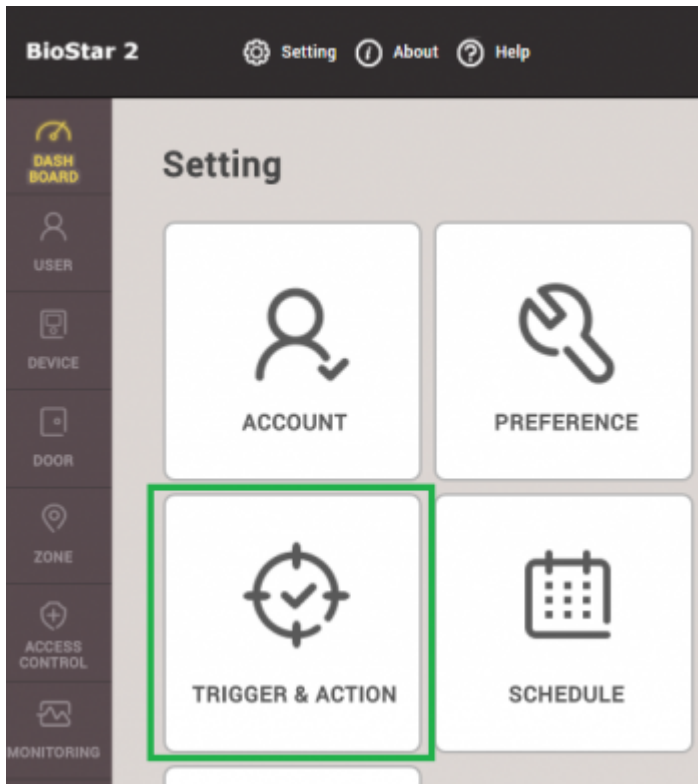

#### Available events for Zone:

- Muster zone alarm detected
- Occupancy Limit Violation (Count Full)
- Interlock door open denied alarm (Occupied)
- Interlock door open denied alarm
- Intrusion alarm detected
- Occupancy Count Alert 2 Detected
- Occupancy Count Alert 1 Detected
- \* Exit Occurred While Occupancy Count Zero
- Occupancy Availability Recovered
- Occupancy Full Detected
- \* Scheduled lock zone alarm detected
- Fire alarm zone alarm detected
- Anti-passback zone alarm detected

## Setting Up a Custom Signal Output

In the scenario below, we will send a custom signal from BioStation A2 Device when there is a forced opened trigger event.

1. Click **Setting** → **TRIGGER & ACTION**.

2. Click **ADD TRIGGER & ACTION**.

3. Enter a name for this trigger on the **Name** textbox.

4. Click on the schedule drop box. Click + **Add Schedule**. If you have a pre-configured schedule, you can use that one by selecting it.

5. Configure the schedule as necessary and click **Ok**. In this case, I would like the trigger to be on all day except for Sunday.

**Add Schedule**

• Name:

• Description:

• Type: ☒ Weekly ☐ Daily

Sunday: 0 3 6 9 12 15 18 21 24

Monday: 0 3 6 9 12 15 18 21 24

Tuesday: 0 3 6 9 12 15 18 21 24

Wednesday: 0 3 6 9 12 15 18 21 24

Thursday: 0 3 6 9 12 15 18 21 24

Friday: 0 3 6 9 12 15 18 21 24

Saturday: 0 3 6 9 12 15 18 21 24

• Holiday Schedule ☐

Ok Cancel

6. Now select the newly created schedule on the **Schedule** drop box.

7. Select the **Door** radio button.

8. Select the door this will affect. The BioStation A2 Device is installed on Door 3 in this example.

9. Check **Forced door opened**.

10. Select your device (BioStation A2).

11. Relay 0 is already used for the door lock so relay 1 will be used for the output.

• Name:

• Schedule:

• Device: ☐ Device ☒ Door ☐ Zone

• Event

☐ Held door open alarmed

☐ Forced door open alarmed

☐ Held door opened

☒ Forced door opened

• Device

All Devices

BioStation A2 541531090 (192.168.16.192)

XpassS2 546260625 (192.168.16.129)

DoorModule20 788879215

• Action

• Output:

• Signal:

12. Click on the **Signal** drop down box.

13. Click **Add Signal**.

14. Fill in the details as desired and click **Apply**.

**Add New Signal**

• Name: Signal for Forced Open

**Signal**

• Delay(ms): 0

• Counts: 25

• ON: 4

• OFF: 1

Apply Cancel

15. Click on the **Signal** drop box and select the signal you just created and click **Apply**.

16. Now when there is a forced door open event, the custom signal is sent to relay 1.

**Real-time Log**

Save Filter Pause Clear ...

Date	Door	Device ID	Device	User	Zone	Event	View
2016/08/03 14:54:01	Door 3	541531090	BioStation A2 ...			Door closed	
2016/08/03 14:53:59	Door 3	541531090	BioStation A2 ...			Forced door opened	

## Setting Up an Email Alert on BioStar

1. Click **Setting** → **TRIGGER & ACTION**.
2. Click on your desired trigger.
3. On Device / BioStar tab, click **BioStar** and check **BioStar**.

← Forced Open Trigger 3/3

• Name: Forced Open Trigger • Schedule: Forced Open Check Schedule
