How to reset APB by user

In the Anti-pass back (APB) zone, there is a function to reset all users who are out of rules. APB reset originally had to reset all users at once. Starting with BioStar 2.7.6, user-specific APB reset is now available.

Clear APB is available in both Door menu and Zone status menu.

Click 'Clear APB'

Default is 'All user' but you can change the option by clicking Specific User.

If you click 'Add' button here, you can add the users you would like to clear APB status.
