Possible integration options 2 ..... 1

## Possible integration options 2

---

Before we had the SVP Android SDK, you had to use Suprema products in two ways;

- BioStar 1/2 SW + Suprema Device + Official FW
- BioStar 2 Device SDK + Suprema Device + Official FW

If you need to operate your system with Suprema devices as your preference, you had to integrate with BioStar Device SDK from the server side and request for the customized firmware. However, from now, you can develop your own firmware and make the device to work with your system without server side modification.
