Version 2.9.0 (Build No. 2.9.0.80) 1

Release 1

New Features and Improvements 1

Bug Fixes 1

Version 2.9.0 (Build No. 2.9.0.80)

Release

2022-09-26

New Features and Improvements

1. Supports BioStation 3
2. Supports user information partial update
 - Supporting device: BioStation 3 v1.0.0
3. Improved extraction of images used for visual face credentials
4. Simplified visual mobile face enrollment process
5. Supports visual face import
 - Enrolls visual face when file name of the image matches user ID
6. Supports visual face migration
7. Device added supporting Fingerprint LFD
 - Supporting device: BioLite N2 v1.5.0
8. Improved door open logs
9. Added logs to indicate full capacity on devices
10. Improved security vulnerabilities
 - Improved Unquoted Service Path vulnerability
 - Improved Clickjacking vulnerability
 - Improved minor vulnerabilities
11. CSV Improved error messages on CSV import fail

Bug Fixes

1. QR/Barcode having the same card ID as a CSN or Wiegand card being authenticated while using 'Server matching' with X-Station 2 (Affects version: v2.8.11)
2. Operator having privilege to edit users couldn't edit user information due to not having email setting view privilege (Affects version: v2.8.14)

3. Event logs not getting stored in the database while 'Real-time Monitoring' displaying the logs (Affects version: v2.8.6)
4. Visitor's fingerprint enrollment failing from 'Visitor' menu (Affects version: v2.8.14)
5. BioStar 2 not running properly due to incorrect MSSQL table constraints (Affects version: v2.8.5)
6. Requiring phone number, a non-required field, when issuing mobile access card via CSV import (Affects version: v2.7.12)
7. Visual face not being synchronized to devices intermittently (Affects version: v2.8.12)
8. Sending users to devices that doesn't need synchronization when another device fails on synchronization when using 'All Devices' as the option of 'Automatic User Synchronization' menu (Affects version: v2.8.6)
9. Users not related to the action of 'Batch Edit' being synchronized to devices that belongs to the target of editing (Affects version: v2.8.14)
10. BioStar 2 abnormally occupying memory when manually locking and releasing a door (Affects version: v2.0.0)
11. Visual face enrollment page not showing any strings when the browser language is set to a language that the enrollment page does not support (Affects version: v2.8.5)
12. BioStar 2 showing success as result when uploading a user having a card ID that already exists within BioStar 2 (Affects version: v2.8.9)
13. Devices supporting 'Extended Auth Mode' intermittently not displaying auth modes correctly (Affects version: v2.8.6)
14. BioStar 2 not finding the correct port when checking licenses (Affects version: v2.7.11)
15. Unassigned 'Mobile Access Cards' being sorted in a descending order in BioStar 2 running with MariaDB (Affects version: v2.8.7)
16. Video logs being recorded shorter than the configured settings (Affects version: v2.5.0)
17. 'Mobile Access Card' issue page not following the 'Date Format' settings when its set as mm/dd/yyyy or dd/mm/yyyy (Affects version: v2.8.9)
18. Export displaying expiry date on 'Mobile Access Cards' that does not have any expiry date (Affects version: v2.8.9)
19. 'Enroll' and 'Search' buttons intermittently disappearing from 'Visitor' menu when enrolling a visitor (Affects version: v2.8.7)
20. Error message indicating the maximum number of face credentials displaying incorrect numbers (Affects version: v2.8.6)
21. BioStar 2 API Swagger not displaying Unicode characters for response (Affects version: v2.8.14)
22. 'Mobile Access Cards' only being issued for 100 cards when the CSV contains more than 100 (Affects version: v2.7.12)
23. Result of the 'Muster Status' on print and CSV having different time zones (Affects version: v2.8.6)
24. Wiegand card ID accepting only 32 characters when it should accept up to 78 characters (Affects version: v2.7.12)
25. Authentication succeeding when the authentication failed to pass the global 'Anti-passback' check (Affects version: v2.8.11)
26. X-Station 2 firmware files not displaying correctly on the firmware upgrade page (Affects version: v2.8.12)
27. Image and video logs not being displayed when accessing 'Monitoring' menu without accessing 'Video' menu (Affects version: v2.7.0)
28. Event logs not displaying when a custom operator sets a filter from 'Event Log' menu having

more than 1,000 user groups (Affects version: v2.8.3)

29. Video logs not being displayed when accessing BioStar 2 using a domain URL (Affects version: v2.6.0)

30. Card not being able to re-used as an arm/disarm card or assigning to a user when the card was registered as an arm/disarm card for an 'Intrusion Alarm Zone' and the zone itself gets deleted (Affects version: v2.5.0)
