Precautions for FaceStation F2 installation

Keep out of direct sunlight.

Install it following the optimal height:
FSF2-ODB: 124 cm | FSF2-AB,DB: 127 cm

Operate it within
-20°C–50°C (-4°F–122°F).

Do not install it in a dark place.

Do not install where the subject is backlit.

How to enroll Visual Face

FaceStation F2 uses Visual Face taken with a visual camera as a means of authentication. Visual Face is an authentication method that distinguishes it from face templates used in face recognition terminals, allowing users to enroll faces in a variety of convenient ways.

Enroll Visual Face on FaceStation F2

Enroll Visual Face directly on FaceStation F2.

Enroll Visual Face on BioStar 2

Take a picture using FaceStation F2 or upload an image file.

Take a picture using a mobile device by following the link sent from BioStar 2.

Import a CSV file.

Note: · Activate the BioStar 2 Cloud before enrolling Visual Face using a mobile device. It requires the Standard or higher license to use this feature.

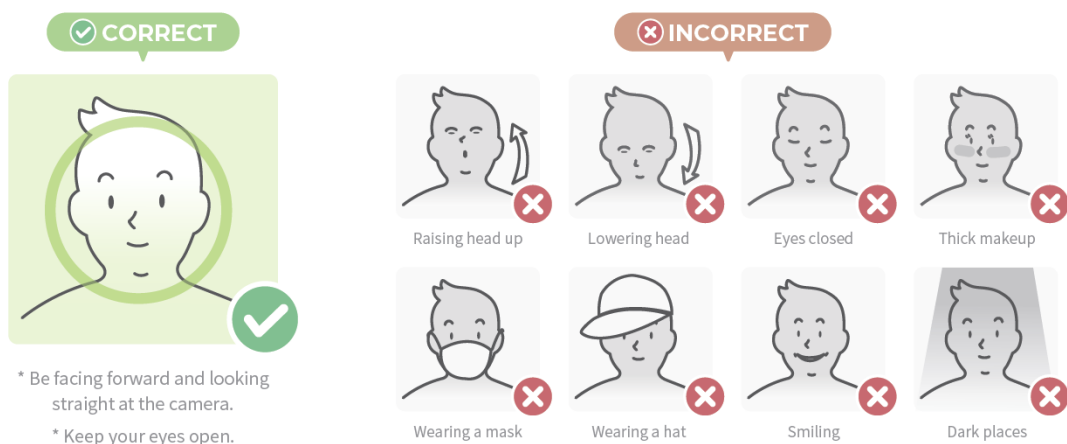

· If the Visual Face enrollment using a mobile device fails, enroll directly on the FaceStation F2.

· The Visual Face enrollment link sent is only valid for 24 hours.

· Refer to the BioStar 2 help manual to learn more about each method.

How to take a picture for Visual Face

To use Visual Face correctly, take a picture by following instructions below.

Resolution | Larger than 250 x 250 pixels

Image size | Up to 10 MB

Supported format | JPG, JPEG or PNG only

Note: - The Visual Face data of FaceStation F2 are not compatible with face templates of FaceStation 2 or FaceLite.
