- [BS2_GetLogBlob](#): Gets certain amount of logs based on the event mask.
- [BS2_GetFilteredLogSinceEventId](#): Gets filtered logs.

Callback Function

```
typedef void (*OnLogReceived)(uint32_t deviceId, BS2Event* log);
```

1. *OnLogReceived*

Callback function that is called when a new log is received.

Structure

BS2Event

```
typedef struct {
    uint32_t id;
