Communication API > BS2_SearchDevicesEx

BS2_SearchDevicesEx

Search for devices in a specific IP address band and update the list of devices available in the current context. The list of devices can be obtained via the BS2_GetDevices function.

> **NOTE**
> Overwrite the old device list.

Declaration

```
#include "BS_API.h"

int BS2_SearchDevicesEx(void* context, const char* hostipAddr);
```

Parameter

- [In] *context* : Context
- [In] *hostipAddr* : Address of the UDP range

Return Value

If successfully done, BS_SDK_SUCCESS will be returned.
If there is an error, the corresponding error code will be returned.
