# Version 2.3.1.b

## Date

2016-11-24

## Bugs Fixed

1. The SDK had issues managing over 64 devices. Now the SDK is feasible to connect 1024 devices.
2. Enum **BS2APBZoneReaderTypeEnum** has been changed on the SFEnum.cs that is used when developing with C#. This enum was not equivalent to the actual value that is being used.

Enum	Before	After
BS2_APB_ZONE_READER_NONE	0	-1
BS2_APB_ZONE_READER_ENTRY	1	0
BS2_APB_ZONE_READER_EXIT	2	1

3. API **BS2\_ReadImageLog** was not able to process images over 16kB. Now, the SDK can receive image logs having size larger than 16kB.
