BioStar 1, Upgrade

How to Upgrade BioStar 1

If you are using BioStar version 1.52 and above, you can use the following procedure to upgrade your BioStar version and reap the benefits such as bug fixes and new features.

If you have a BioStar version lower than 1.52 installed, you cannot upgrade to versions above 1.52 by simply deleting and installing the most recent BioStar **unless you are upgrading to 1.93**.

You will have to follow the procedure shown in the How to Resolve a Database Compatibility Issue to upgrade without any issues.

* If you are upgrading to BioStar 1.93 you can follow the upgrade procedure below regardless of what current version you are on.

Software License

If you are using a software license (not a dongle) for BioStar Standard version, back up the BioStar.lic file in C:\Program Files(x86)\BioStar\server and paste it to the same location in your upgraded server.

Upgrade Procedure

Deleting BioStar will not delete your database but please back up your database so that you may revert your database if the database upgrade fails.

1. To back up your database, see How to make a backup of MSSQL database.

- You can restore your database in the future through the instructions, see How to restore a database backup in MSSQL Server.
- 2. Uninstall BioStar from the control panel.

2/3

3. Download the most recent version of BioStar installation file: Download link.

If you are only using 1.x devices we recommend that you install BioStar 1.9.

4. Install BioStar with the setup file.

🛃 BioStar 1.9.1.14 Setup.exe	6/30/2016 12:26 PM	Application	242,945 KB

5. After the installation finishes, open BioStar Server Config with administrator privileges and check that your database Server and authentication are set properly and click apply.

	Database Type	SQL Server	 Configure 	
SQL	Database Name	BioStar		Set Name
	 Server Authentic 	ation	Windows A	uthentication
	Database Server	ETHAN-PC\SQLSEF	Port	1433
	ID	sa	Password	*****
	Max Connection	1		

6. Open the BioStar server folder at C:\Program Files (x86)\BioStar\server.

7. Run DBSetup with administrator privileges.

Local Disk (C:) Program Files (x86) BioStar server Include in library Share with Burn New folder					
sktop	DBManager.dll	6/30/2016 12:20 PM	Application extens	22 KB	
wnloads =	뤒 DBSetup.exe	3/26/2014 10:43 A	Application	124 KB	

8. Run BioStar and check that all functions operate properly.

If you are having issues with the upgrade, please refer to an article of Fresh Desk and contact Suprema TS team.
