How to use Leave Management function 1

How to use Leave Management function

If you want to authorize Leave to an employee, you can utilize Leave Management tool.

A Leave can be a various types of absence such as personal leave (vacation or time-off), family incidents (death or accidents), maternity leave (fraternity leave), Work off-site or business trips, or military service or jury duty(citizenship duties). Some of these can be taken into account as a part of worktime(paid time-off), or not considered as part of worktime(non-paid time-off).

Scenario in this example:

An employer(Administrator) needs to go for his military service duty on Nov 1st, 2018.

The purpose of using Leave Management is to identify if an employee is entitled to have paid time-off or non-paid time-off.

Worked: paid time-off(counted as a part of worktime)

Non-worked: non-paid time-off(not considered as part of worktime)

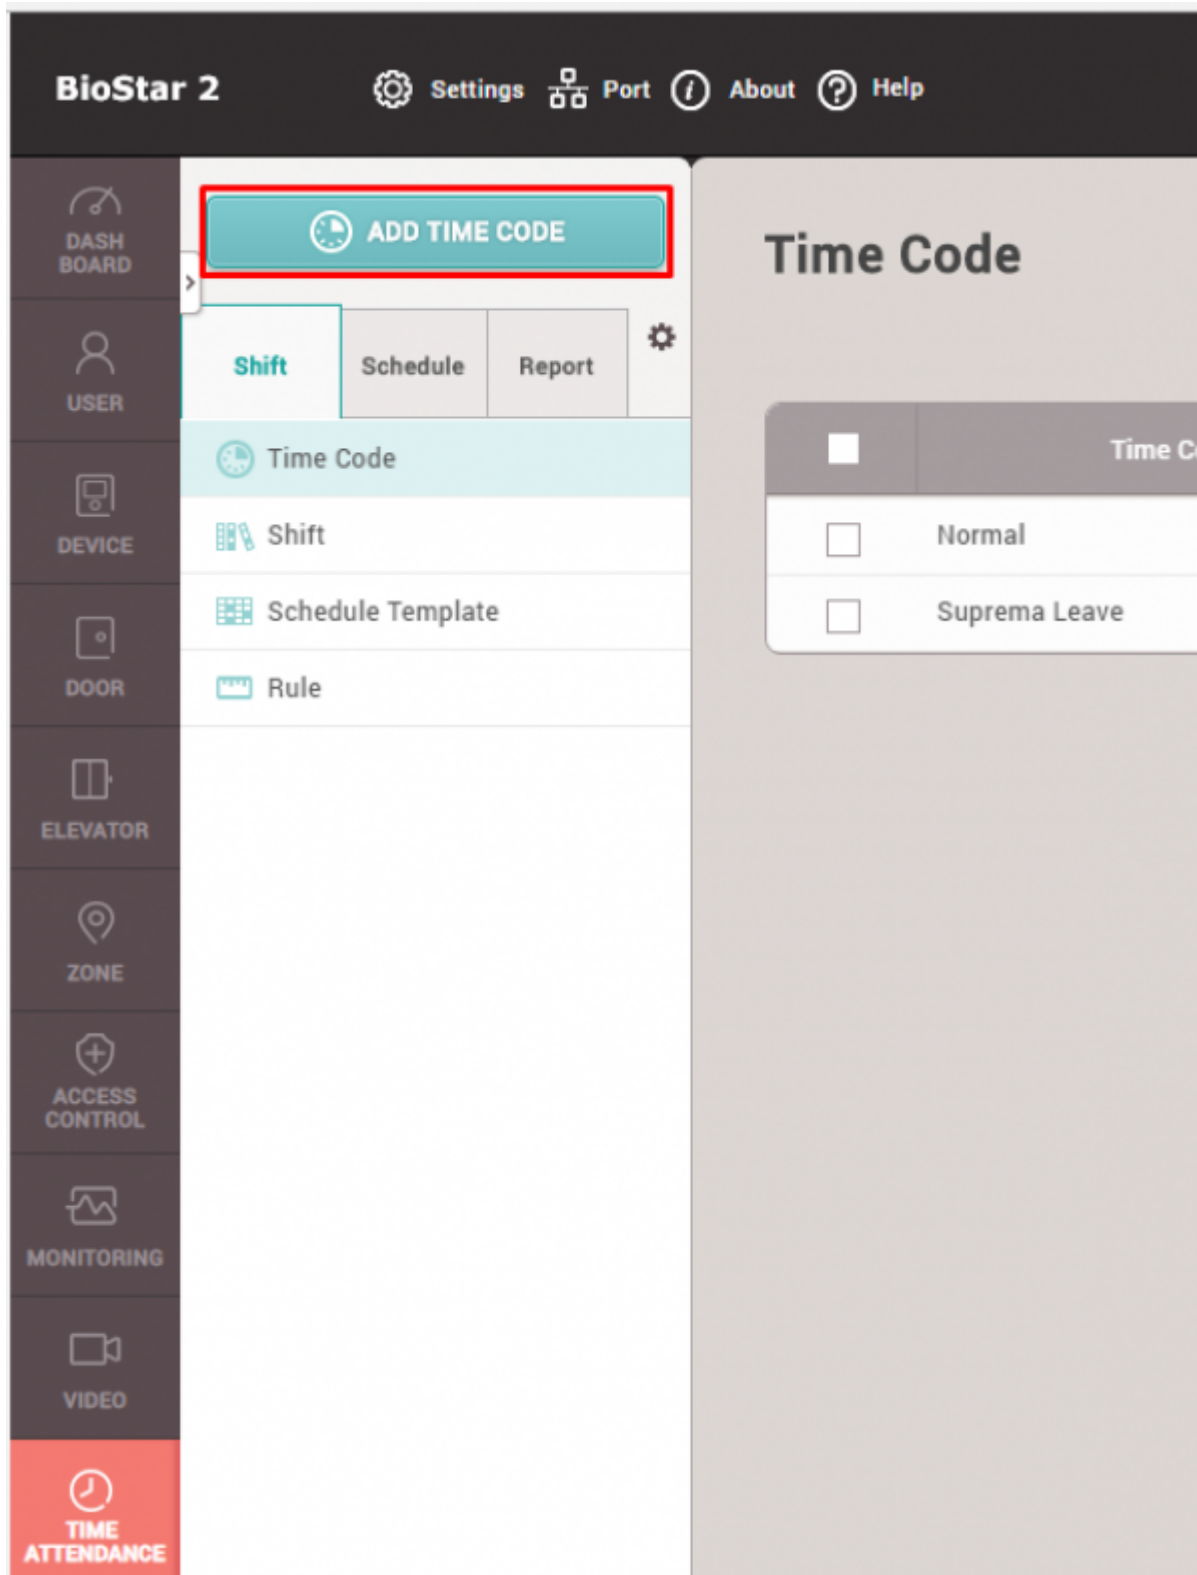

*Because the military service duty is not taken off of the employer's entitled leave for the year, it will be considered as "Worked" leave in this example.

This characteristics is also explained in two articles with examples below:
