# Added Hide Face Credential Preview Image Option

<b>Affect Products &amp; Versions</b>	
<b>BioStar 2</b>	BioStar v2.8.16 or above

On the sites where face credentials are used, there were requests to block the preview of a user's face credential to protect user privacy reasons. Suprema supports the function that does not show the preview of the face credential from BioStar 2.8.16 by reflecting the market requirements.

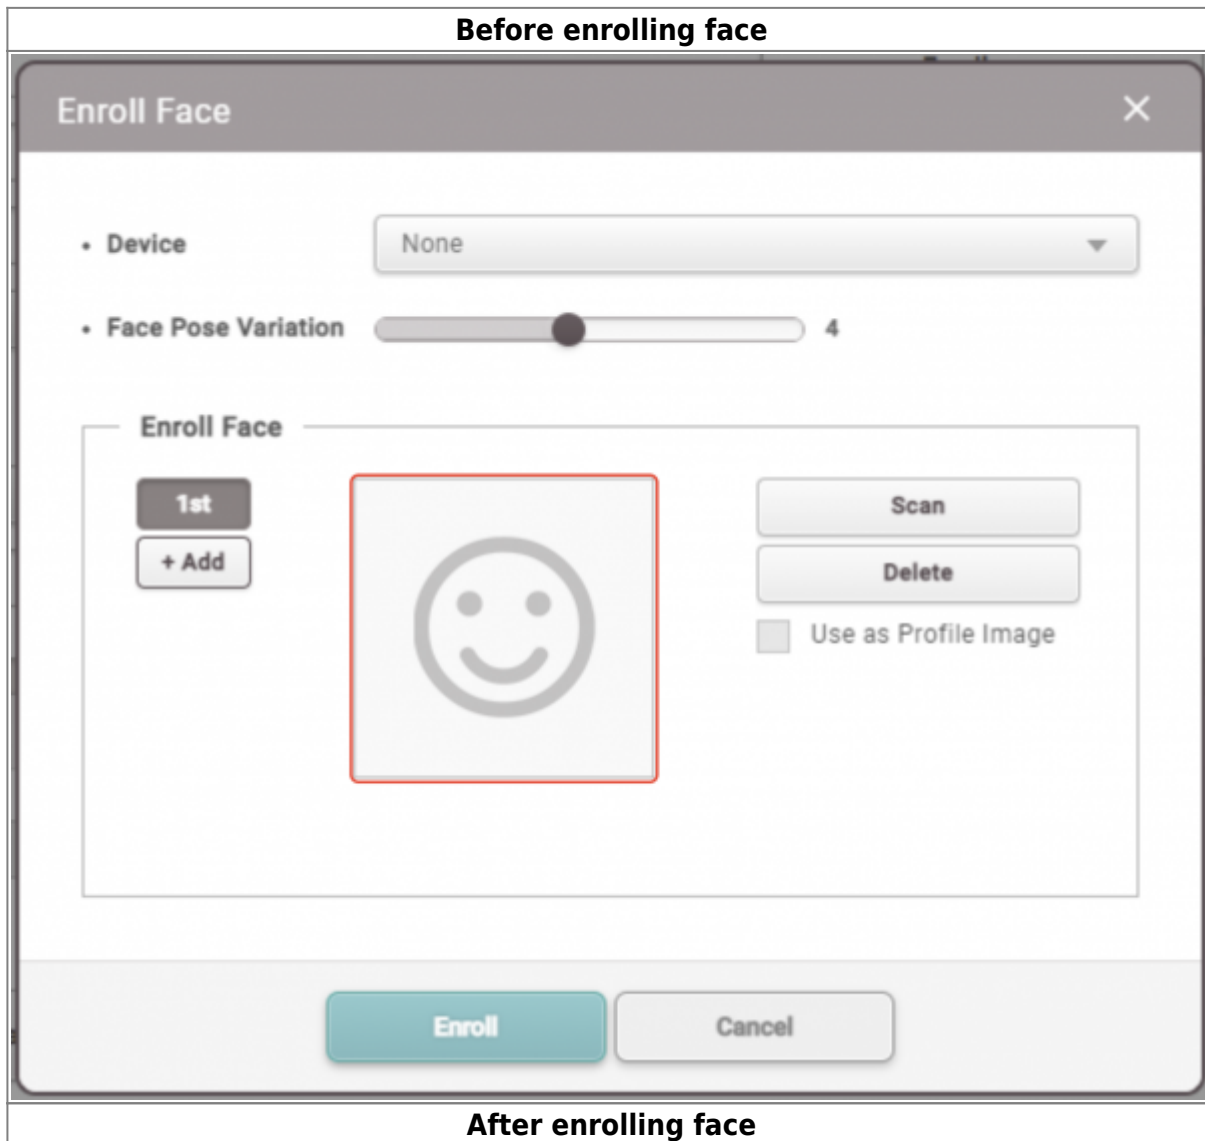

## How to apply the 'Hide Face Credential Preview Image' function

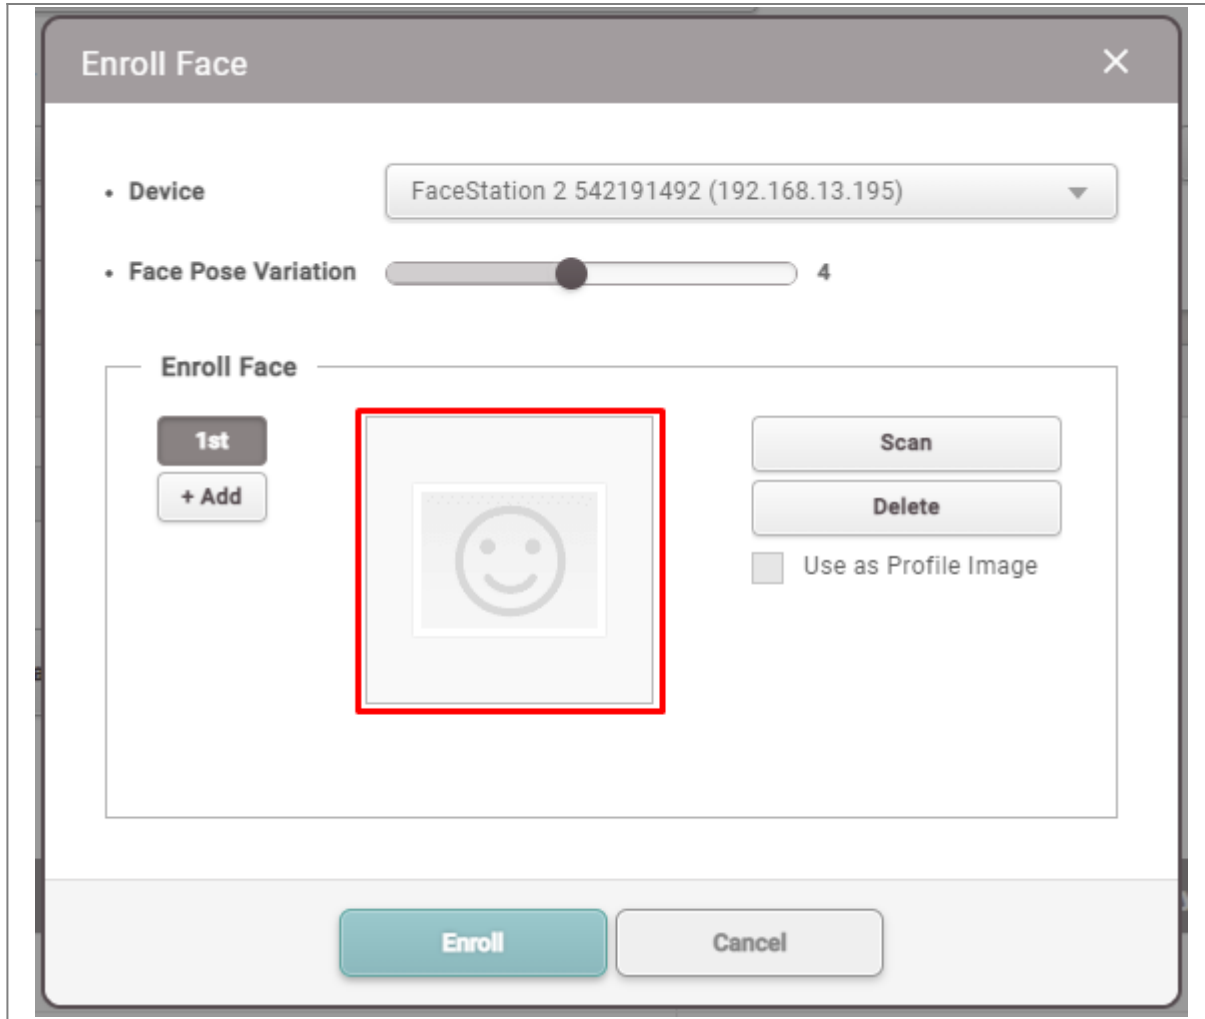

1. Login BioStar 2 server and go to [Settings > Server > User/Device Management] part.
2. Active 'Hide Face Credential Preview Image' by toggle..

# How it shows after applying 'Hide Face Credential Preview Image'

## 1) Face credential: FaceStation 2, FaceLite

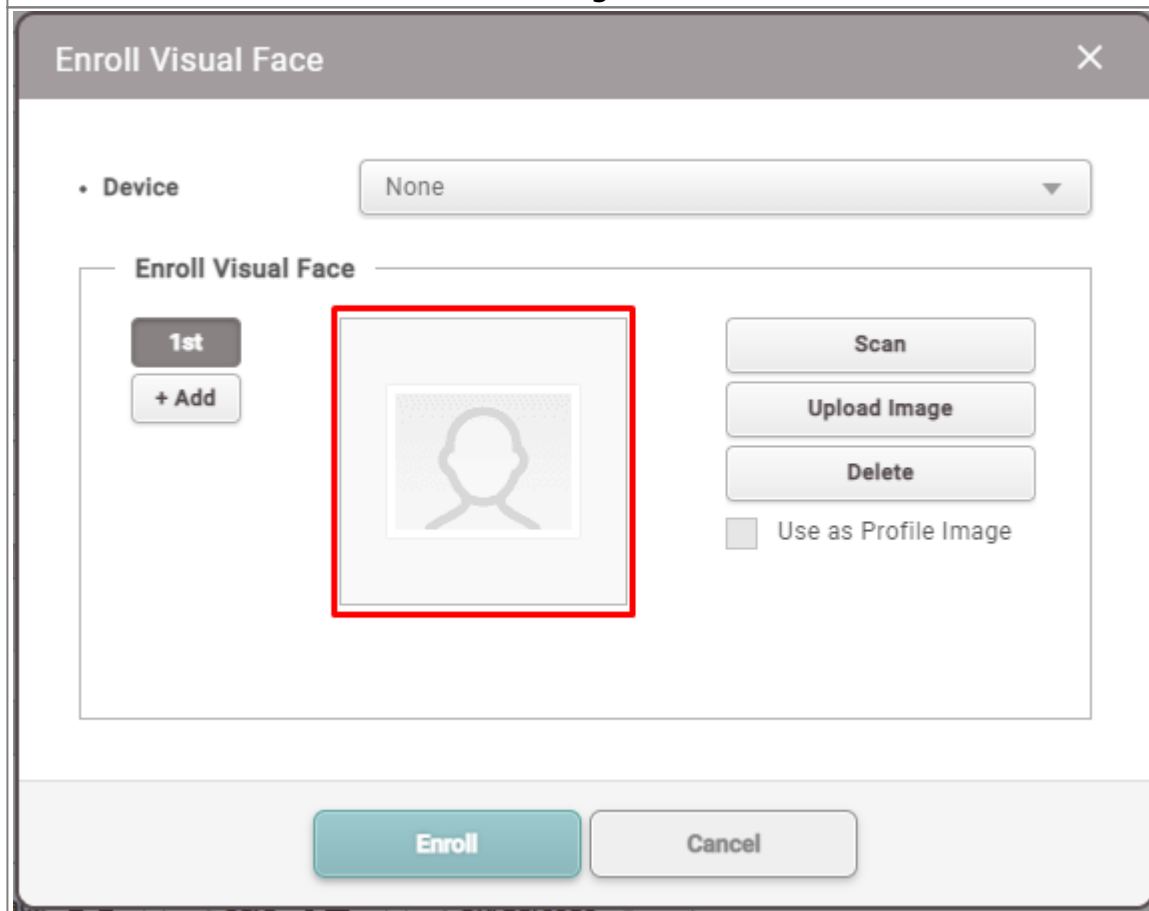

## 2) Visual Face credential: FaceStation F2

**Before enrolling visual face**

After enrolling visual face
