The number of access group and access level 1

The number of access group and access level

Before BioStar 2.7.0, BioStar 2 was limited to 128 Access groups and Access levels. From BioStar 2.7.0, BioStar 2 can create access groups and access levels infinitely without any restriction.

BioStar 2 allows you to create infinite number of Access group, but this number is limited by the device FW's and the number is different for each FW.

FW list which can accommodate up to 2048:

Model	Version
BioStation 2	v1.7.0 or later
BioStation A2	v1.6.0 or later
BioStation L2	v1.4.0 or later
BioEntry W2	v1.3.0 or later
FaceStation 2	v1.2.0 or later
CoreStation	v1.2.0 or later
BioEntry P2	v1.2.0 or later
BioLite N2	v1.1.0 or later
BioLite	v1.1.0 or later
FaceLite	v1.0.0 or later
Xpass 2	v1.1.0 or later
FaceStation F2	v1.0.0 or later
X-Station 2	v1.1.0 or later

Others including Entry devices with firmware version V2.x can accommodate up to 128 access groups

Sync error occurs when the number of Access Groups for the FW exceeds its limit.
