• **BioStar 2 Features**

BioStar 2 sets the new standard in security. The powerful biometric access control framework provides system integrators the ability to easily integrate with 3rd party systems and allows software developers to build new applications and functions into BioStar 2. Accessibility to BioStar 2 and its APIs is further extended through cloud services.

• **BioStar 2 and Web Security**

Web security is crucial in the modern world because 70% of all hacking is done through the web. Since the web holds the characteristic of easy access, it is also prone to be exposed to vulnerabilities. This article explains the differences of the two security protocols (HTTP and HTTPS) that are being by used by BioStar 2, which is a web-based security platform, and explains the reason why HTTPS should be used.

• **Introducing BioStar 2's Time and Attendance System**

BioStar 2's time and attendance management system consists elements of Pay Code, Shift, Schedule, Schedule Template, and Overtime Rule. The Time Card and Report features can be used to edit or print out individual time and attendance records as reports. Structure-wise, BioStar 2 T&A and BioStar 1 T&A may look similar. However, BioStar 2 T&A simplified the complicated configuration of BioStar 1 T&A and increased the flexibility of the functions to allow diverse configurations.
