User group sorting and user ID sorting are available in <Mustur Status>	1
---	---

User group sorting and user ID sorting are available in <Muster Status>

Since BioStar 2.7.11, you can be sorted by user ID and user group ID in <Muster Status>.

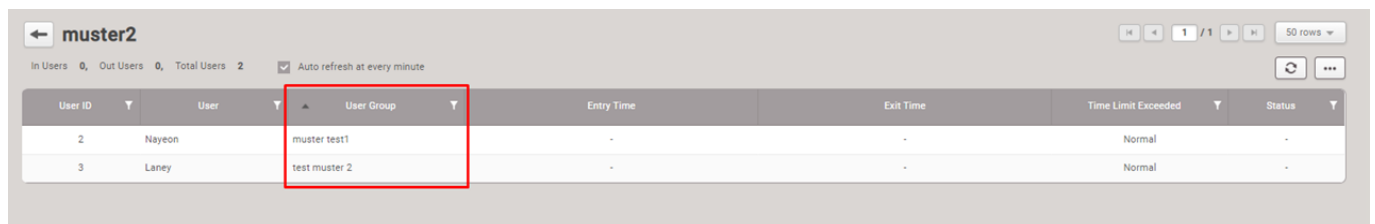

For more information about sorting user ID, please refer to the article below.

- [User ID sorting depending on the user ID type setting in the server](#)

Until BioStar 2.7.10, user group ID sorting did not work properly for <Muster Status>.

Starting from BioStar 2.7.11, you can be sorted correctly by user group name.

BioStar 2 > MONITORING > Zone Status

User ID	User	User Group	Entry Time	Exit Time	Time Limit Exceeded	Status
2	Nayeon	muster test1	-	-	Normal	-
3	Laney	test muster 2	-	-	Normal	-
