BioStar 1

How to open and close doors in BioStar 1

BioStar allows administrators or operators to control doors, alarms, and devices remotely. You can open or close doors via a computer connected to the BioStar Client. You can also release (cancel) alarms remotely and lock or unlock devices.
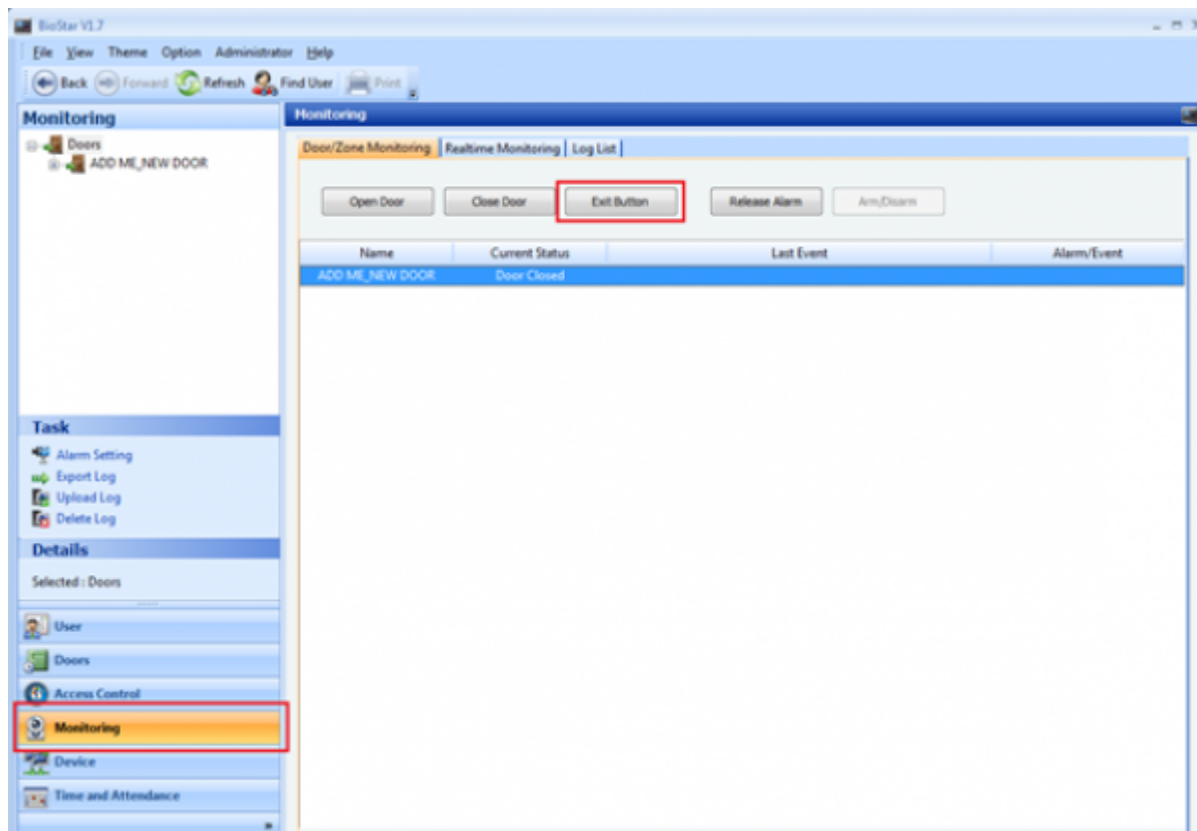

To open or close doors:
On the **Monitoring** page, click the door name then click **Open Door** or **Close Door**.

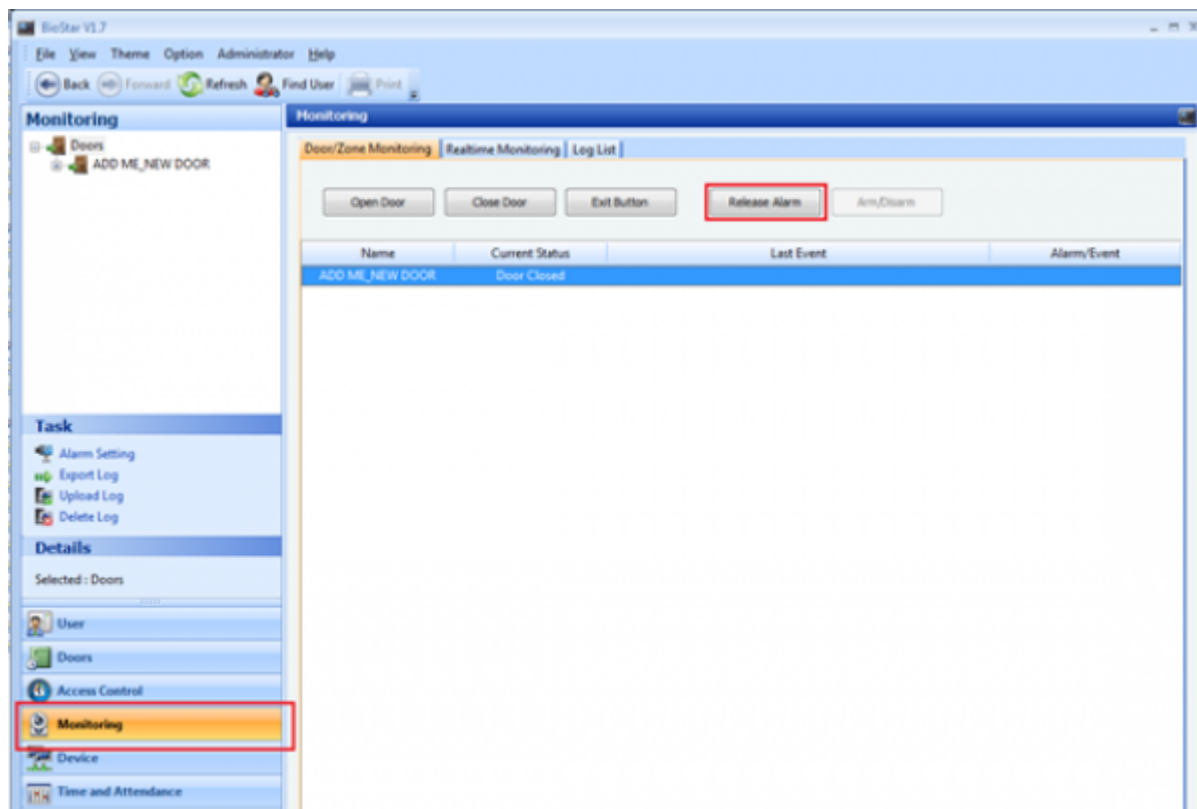

To open door only for the door open period set in the doors:
On the **Monitoring** page, click the door name then click **Exit Button**.

To release an alarm:
Click the door name then click **Release Alarm**.
