## How to set up an alarm zone

BioStar allows you to set up an alarm zone where you can determine how doors in the zone behave when someone breaks into the zone.

You can set up a fire alarm zone by performing the following steps:

## 1. On the **Doors** page, click **Add New Zone**.

Eile Yiew Theme Option Administrato 🕞 Back 画 Forward 🌀 Refresh 錄 Fi				
oors	Doors			
- de Doors	Name	Door Open Period(sec)	Door Relay	Devices
- 🚛 New Door	New Door	3	11661	11661[192.168.0.49]

2. Enter a name for the alarm zone and choose Alarm Zone from the Type drop-down list.

Add New Zone	×
Name	My alarm zone
Туре	Alarm Zone 🔻
	OK Cancel
	OK Cancel

3. Click **Add Device** to add devices to the zone. This brings up the **Add Device** dialog.

4. Choose devices you want to add and click the right arrow button. This brings up the **Select Zone Attribute/Type** dialog.

Add Device	×
Select Device below Tree           Device           10008[192.168.0.80]           35824[Clocking In]           35825[Clocking Out]           35826[Cooling Plant]           43690[192.168.0.70]           55760[Generator Station]           59972[192.168.0.81]	
Save	Close

5. Choose from the **Device Attribute** drop-down list and choose **Card** or **Key** for **Arm/Disarm Type**. Then, click **OK** and **Save**.

If you set **Device Attribute** of a device as **Arm/Disarm**, you can arm and disarm the zone using the device.

6. Click **Add Input** to determine the input type for the zone.

7. When there is an input signal from the input port specified here while the zone is armed, the alarm sets off.

- Name: Type in a name for the input.
- **Device**: Choose a device.
- Available Input: Choose an input that you want to receive a signal from.
- **Switch**: Choose a switch type
- Duration: the length of an input signal to trigger the alarm
