Changing Language Display at Custom Setting

Here is a demonstration of putting a custom language to the device. I will set the language to **Custom** and change the "Access Granted" window to display it in Spanish "Accesso Permitido."

*Note: If you use a language that requires a special font, scroll down the list and find the font at the end of the .rc file, uncomment and erase the section (for example, erase Latin :), and add **60000** to apply the font.

	2764	//Latin : HelveticaNeueOTS

ex. Selecting Latin Font to display the username or text in Latin

1. Find the **Custom** section at the **Resource Table**.
