Step 1: Create new card	1
Example 1 - Create New CSN Card	1
Example 2 - Create New Wiegand Card	1
Step 2: Assign the card to certain user	1

How to assign the card after you create new card

Step 1: Create new card

If you want to create new card via BioStar 2 API, you should use one of API in the below list.

POST	/cards/csn_card	Create CSN Card
POST	/cards/wiegand_card	Create New Wiegand Card
POST	/cards/secure_credential_card	Create New Secure Credential Card
POST	/cards/access_on_card	Create New Access On Card

Example 1 - Create New CSN Card

- [POST] /cards/csn_card

- “card_id” means the card number displayed on the screen of BioStar 2.

Example 2 - Create New Wiegand Card

- [POST] /cards/wiegand_card

- “card_id” means the card number displayed on the screen of BioStar 2.
- “wiegand_format_id” means the unique id for wiegand format. You can check the wiegand format options by calling [GET] /cards/wiegand_cards/formats API.

Step 2: Assign the card to certain user

To assign the card to certain user you should call below API.

PUT	/users/{user_id}/cards	Create or Update user card Collection
-----	------------------------	---------------------------------------

- “card_id” means the card number displayed on the screen of BioStar 2.
- “id” means the unique number allocated when the card is stored in BioStar 2 DB. It is not displayed on the screen so that you can check it by calling [GET] /cards/unassigned API.
