# Version 2.8.11 (V2.8.11.60)

## Release

2021-07-16

## New Features and Improvements

1. Supports Occupancy Limit Zone.
  - Occupancy Limit Zone: This feature enables an administrator to manage and control the population density of a place to prevent overcrowding and monitor the zone status.
2. Supports a new device.
  - X-Station 2
3. Renamed the lighting brightness control feature and added the 'Not Use' option to FaceStation F2.
  - Changed the option name from 'Ambient Brightness' to 'Light Brightness'.
  - Improved turning off the light of the device by adding the 'Not Use' option.
  - Removed the 'Auto' option.
4. Separated email settings of both Visual Face Mobile Enrollment and QR.
5. Updated APIs in Swagger.
  - Created a new API related to Occupancy Limit Zone.
  - Updated the existing APIs related to Visual Face, CSV export and import, thermal camera settings, and temperature log.
  - Created a new API related to QR/barcode for X-Station 2.
6. Updated the Japanese resource file.

## Bug fixes

1. A 'TypeError: Cannot read property 'replace' of undefined' error occurred in the browser console when issuing a CSN card to users. (Affects version: v2.8.9)
2. Fingerprint authentication failed on the device where the data was transferred from BioStar 2 via Data File Export. (Affects version: v2.8.10)
3. When performing Import Event Logs from the device with a compatible version of firmware installed, a compatibility error occurred and it was not able to import data. (Affects version: v2.8.10)

4. It was not able to log in with users registered in the BioStar 2 version 2.6.4 when upgrading the version to 2.8.9 or later. (Affects version: v2.8.9)
