Table of Contents

User group sorting and user ID sorting are available in <Muster Status>

Since BioStar 2.7.11, you can be sorted by user ID and user group ID in <Muster Status>.

For more information about sorting user ID, please refer to the article below.

• User ID sorting depending on the user ID type setting in the server

Until BioStar 2.7.10, user group ID sorting did not work properly for <Muster Status>.

Starting from BioStar 2.7.11, you can be sorted correctly by user group name.

BioStar 2 > MONITORING > Zone Status
