Unified VMS + VA + AC (Door Control & Event Monitoring) Interface

Door Icon Display on Visual Map

Access Event & Video Playback

Device Status Door Control

The screenshot shows the Suprema Unified VMS + VA + AC interface. It features a central video feed of a hallway. To the left is a sidebar with various controls. To the right is a panel showing access events and video playback. A red box highlights the "Door Control" section in the sidebar, which includes buttons for "Door close", "Door unlock", and "Door lock". Another red box highlights the "Access Event & Video Playback" section on the right, showing a list of events and a video playback window. A third red box highlights the "Door Icon Display on Visual Map" section, showing a 3D floor plan with a door icon.
