How to Use the Quick Action

A new addition to the **TRIGGER & ACTION** menu, **Quick Action** allows you to quickly control the operation of the door in an emergency situation.

By adding the **Quick Action** button in the **CUSTOM INTERFACE** menu, you gain the ability to conveniently control multiple doors simultaneously. Simply click the **Quick Action** button on the BioStar 2 main screen to initiate the command.

Adding the Trigger & Action to Use as Quick Action

1 Click **Settings → TRIGGER & ACTION**.

2 Click **ADD TRIGGER & ACTION**, and then set each item to add the desired action.

3 Select Schedule to **Always**, check **Use as Quick Action**, and then click **Apply** to save settings.

- **Quick Action** is only available when the **Schedule** is **Always**.
- By selecting **Use as Quick Action**, you can create an action without the need to specify an **Event**.

Adding the Quick Action Button to the Biostar 2 Main Screen

1 Click **Settings** → **CUSTOM INTERFACE**.

2 In the **Quick Action Layout**, click **+ Add** to enter and select each item.

▶ The image above is an example screen and may differ from the actual screen.

- **Operator Level**: Select the **Operator Level** that can run the added **Quick Action**. You can select multiple options.
- **Trigger & Action**: Select the **Trigger & Action** to run. You can select multiple options.
- **Confirm Before Run**: Enabling this option prompts a confirmation pop-up when pressing the **Quick Action** button on the main screen, asking whether to proceed with running the **Quick Action**.

3 Click **Apply** to save the settings.

4 Click **Apply** on the **Custom Interface** screen. Check the confirmation pop-up and click **Yes**. The **Quick Action** button added to the top bar of BioStar 2 will be created.
